

Now how will pass date in this card now?

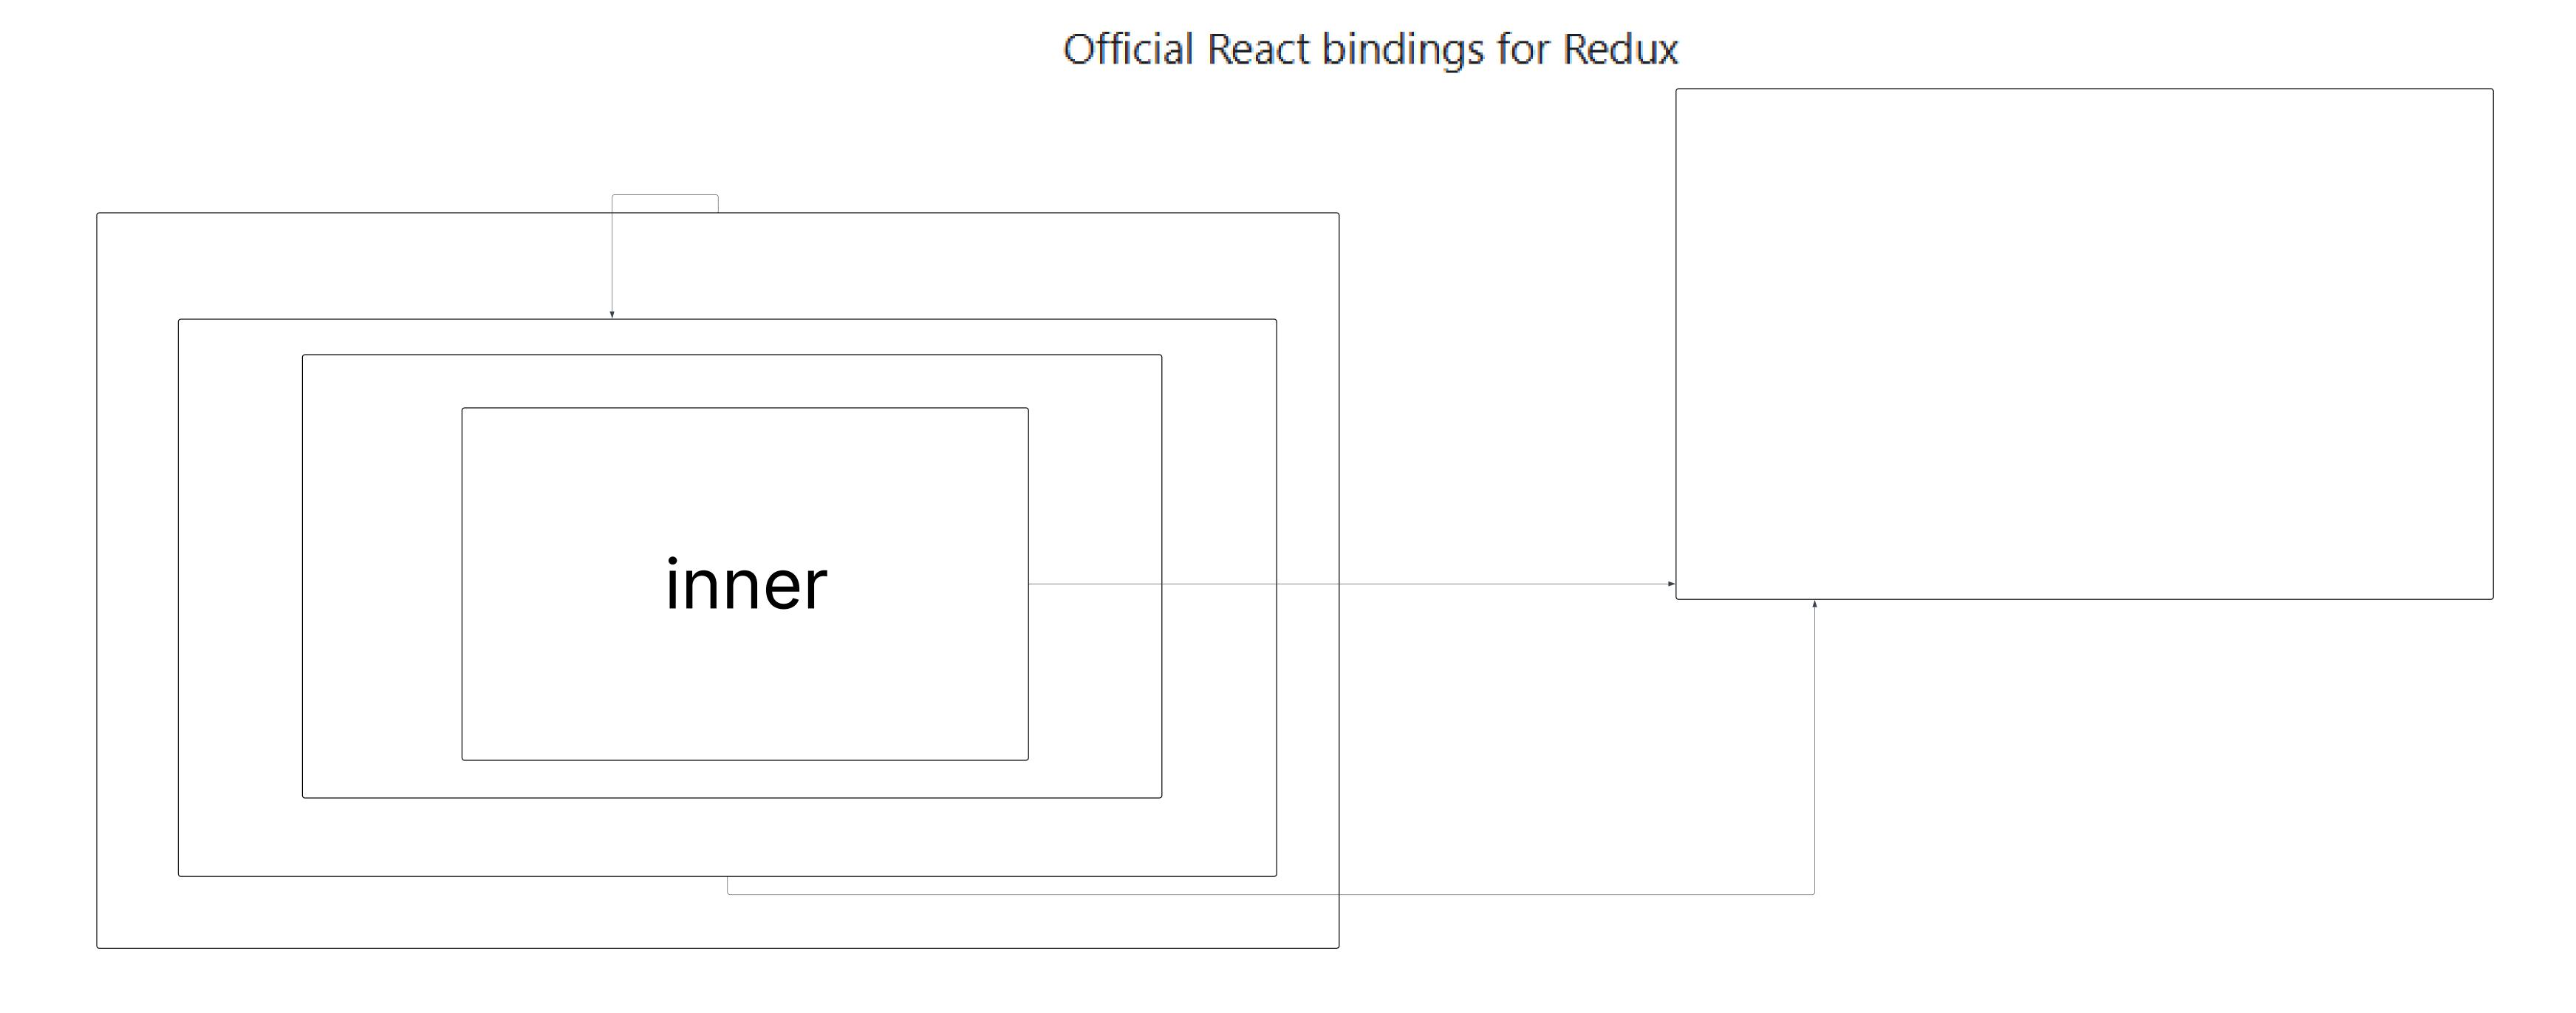

REDUX react- REDUX

if we are working with redux then we will need both Redux and react-redux

Redux 🔼

A predictable state container for JavaScript applications

React-Redux 🔼

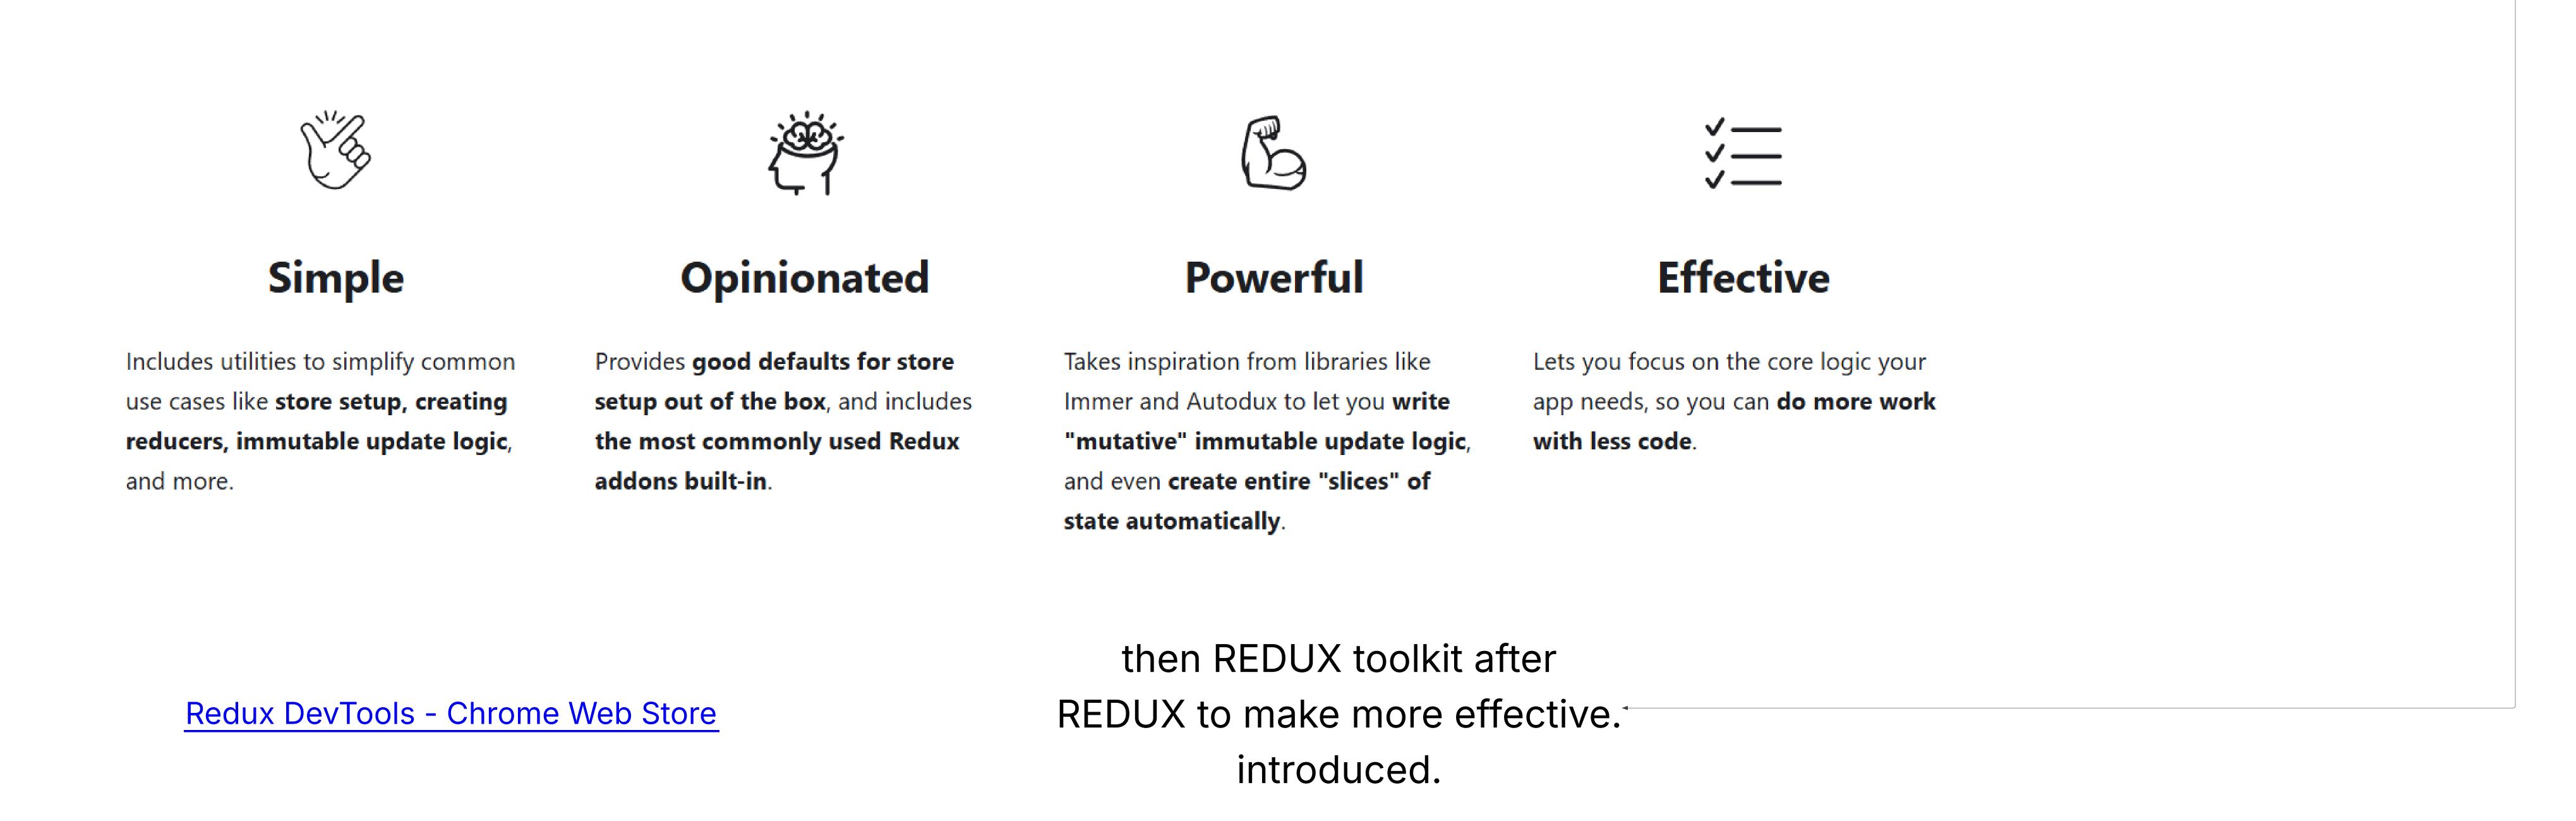

FLUX-before REdux-

contral store, one more importantt things is data Flow, even the data flow or structure in Redux is good then context-APIto solve this flow problelm

then REDUX

introduced.

better version of flux., and redux is independent library and can be used in js framework.

- 1. STORE
- 2. REDUCER
- 3. USESELECTOR
- 4. USEDISPATCH
